

MATERIAL & EQUIPMENT MANAGEMENT

All Scanwiz features at a glance

Your benefits at a glance

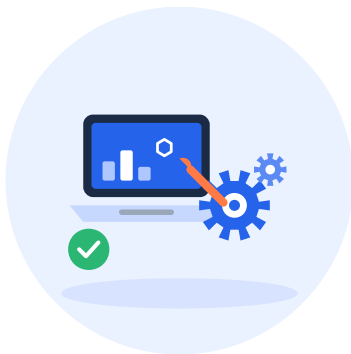

Executive Summary

Scanwiz turns paperwork and scattered Excel lists into a single, living system. Every item, every device and every maintenance task is captured by scan, findable at any time and documented without gaps – so your team searches less, reorders less and gains more time for the work that matters.

Inventory processes

Who is using what, where is it, what is running low? With assignments and scan-based bookings you keep your stock under control in real time – saving time, cutting costs and making your material flow digital from end to end.

Inventory overview

Manage items, equipment and the related documents centrally in one place. Thanks to its modular design, Scanwiz adapts to any kind of asset, to your own roles and to your existing systems.

Keep your inventory ready for use

With maintenance plans, a ticketing system for repairs and real-time analytics, your equipment stays reliably in service – secure, traceable and connected to your existing systems.

Capture everything, manage it centrally

With its modular design, Scanwiz offers flexible, comprehensive inventory management for every kind of equipment – fully adaptable to your requirements.

- Inventory of all assets**
 From cordless screwdriver to machine: map your entire stock with your own categories, attributes and photos.
- Variants & batches**
 Map complex item structures too: variants such as sizes or versions and batches stay clear and fully traceable.
- Asset & document management**
 Attach manuals, test certificates, maintenance logs and images directly to the item – ready to hand for the whole team.
- Barcode & QR code scanner**
 Scanned with a smartphone or tablet, every item is booked in seconds – including bulk capture and fast stocktaking.
- Categories & custom roles**
 Create your own categories and use roles to control exactly who may see and edit what.
- Reporting**
 Analyse stock movements and inventory trends and optimise your processes in a targeted way – with clear reports.

The screenshot displays the Scanwiz web application interface. On the left is a sidebar with the user profile 'Markus Zauberer admin' and a main menu including Dashboard, Articles, Stock, Assignments, Orders, Inventory Count, Reports, and Offline. The main content area is titled 'Articles' and contains a search bar, category filters, and a table of items. The table lists items like 'KASK Superplasma AQ Safety Helmet', 'Makita cordless drill', 'Multi-purpose gloves', 'Screw box HeliA, 25mm', and 'Work trousers, grey / black'. A detailed view of the 'KASK Superplasma AQ Safety Helmet' is shown on the right, featuring a product image, master data (unit: Piece, category: Safety helmets), and an 'UNASSIGNED' section with a 'Book In' button. The bottom of the interface shows 'Stock in Warehouse' and 'Store' buttons.

Assignment & tracking

Once your items and devices are recorded in Scanwiz, every object can be assigned seamlessly – to employees, projects, rooms or locations. Track allocation, usage and status in real time, optimise reservations and returns, and keep a complete history of every assignment.

Assignment to people & projects

Issue devices to employees, projects or locations – who uses what is instantly visible.

Assignment, return & transfer

Issue, return and rebooking by scan – with signature, location and history.

Assignment & scheduling

A dedicated calendar per device for bookings, maintenance and inspection dates.

Location & history

Location changes and usage per item traceable at any time.

Multi-tenancy

Map locations, branches and workshops separately and filter them in a targeted way.

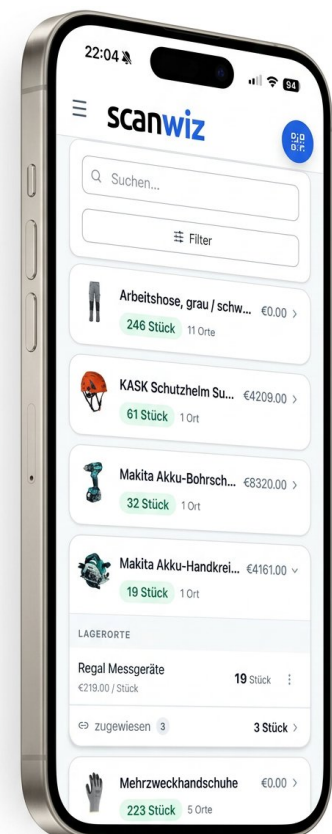

Cloud-based inventory management

Ready to use anywhere – no installation, scalable, hosted in Germany.

Data import & integrations

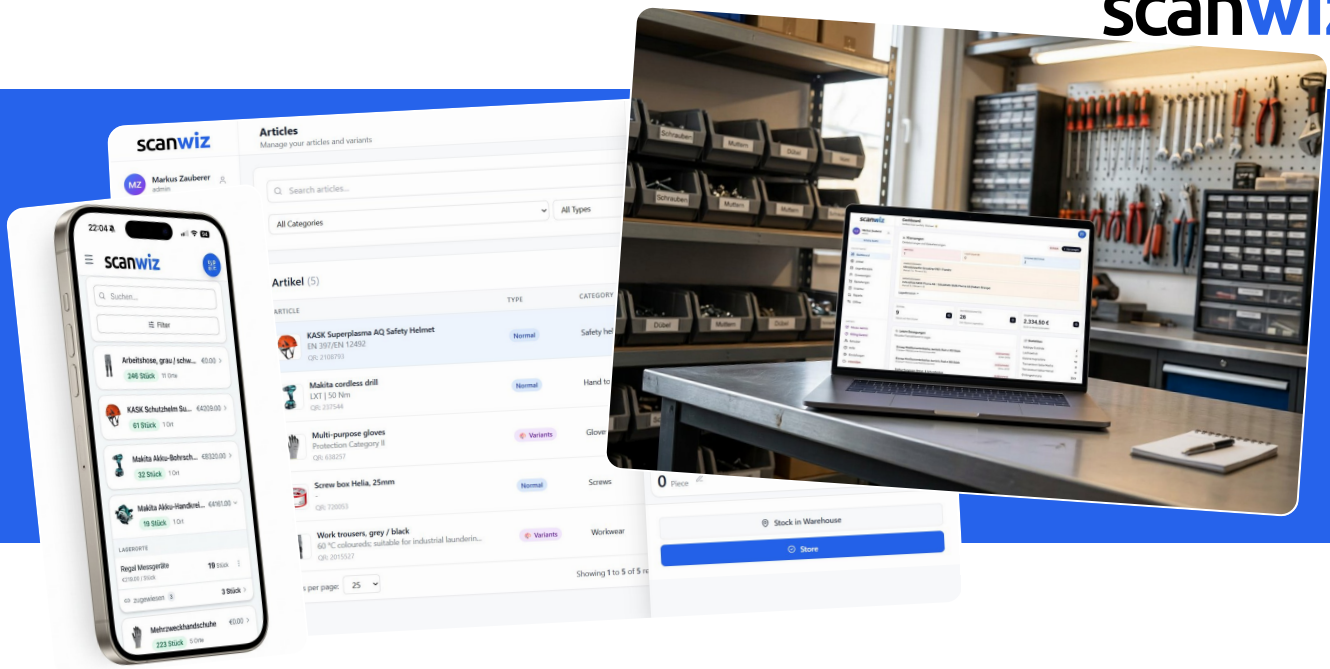

Import existing data via Excel/CSV or connect through the REST API.

Automated maintenance

At Scanwiz, maintenance is not an afterthought but part of the system: a ticketing system for repairs and inspections, QR/NFC access right at the device, meaningful analytics, secure sign-in via single sign-on and a complete warehouse module all mesh together seamlessly.

Try it free for 14 days

Register your no-obligation demo account and organise materials, equipment and maintenance digitally in just a few minutes – no installation, no credit card.
