

MATERIALS MANAGEMENT FOR MEDICAL FACILITIES

# All Scanwiz features at a glance

Your benefits at a glance

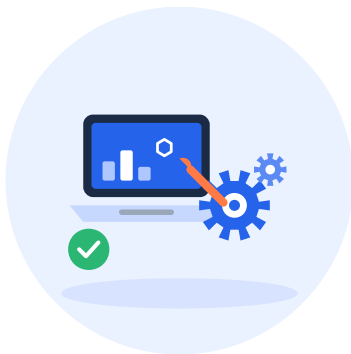

# Executive Summary

Scanwiz brings order to practice and clinic stores: medications, consumables and lab supplies are captured by barcode scan, with batches and expiry dates traceable at any time. This saves your team time on documentation and stocktaking – and frees up more time for patient care.

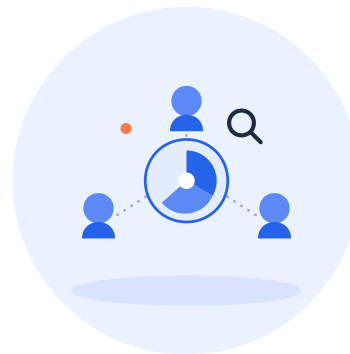

## Inventory processes

What is in stock, where is it, what is running low or about to expire? With scan-based bookings and clear allocation you keep stock in view in real time – preventing shortages, cutting costs and making material flows digital from end to end.

## Inventory overview

Manage medications, consumables, lab supplies and devices centrally in one place. Thanks to its modular design, Scanwiz adapts to every type of item, to your own roles and to your workflows in the practice, lab or clinic.

## Keep your inventory ready for use

With maintenance and inspection plans, a ticketing system for repairs and real-time analytics, devices and instruments stay reliably ready for use – secure, traceable and connected to your systems.

# Capture everything, manage it centrally

With its modular design, Scanwiz offers flexible, comprehensive materials management for practices, labs and clinics – fully adaptable to your requirements.

**Inventory of all items**  
From medications and consumables to instruments and devices: record your entire stock with your own categories, attributes and photos.

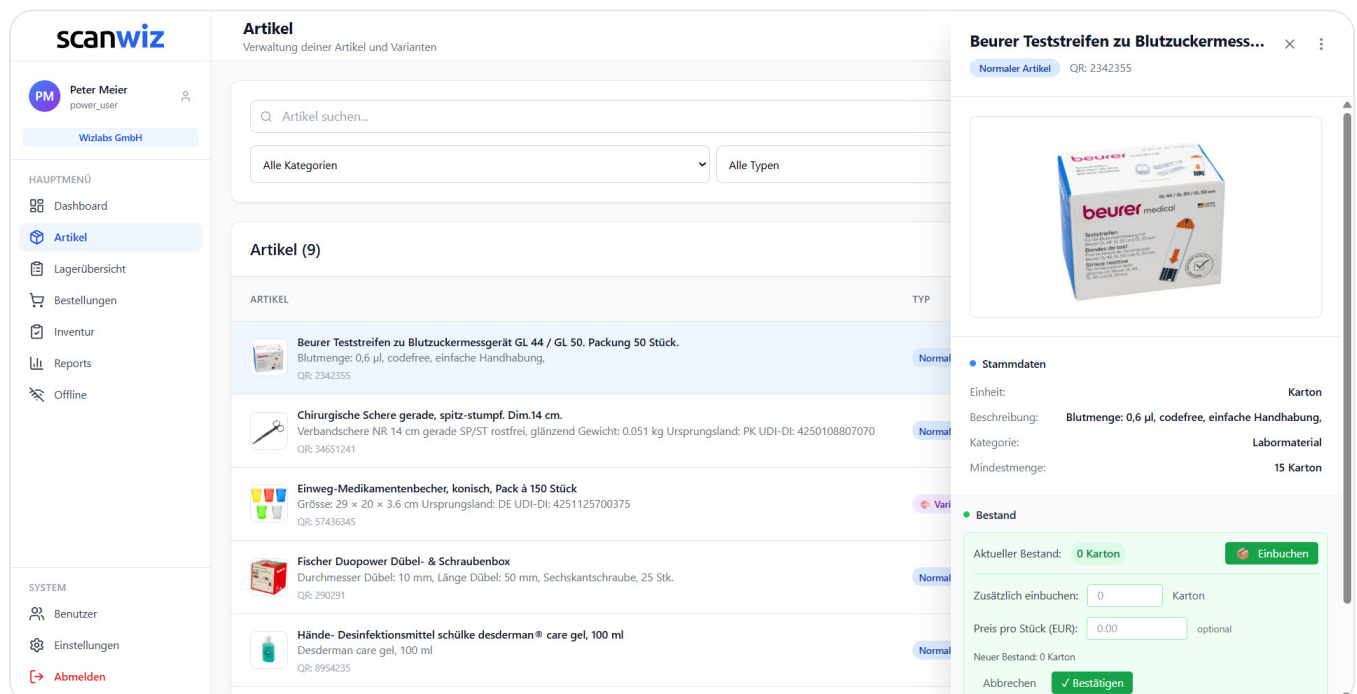

**Variants & batches**  
Whether glove sizes, medication batches or syringe types: variants and batches are mapped cleanly – including batch numbers and expiry dates for complete traceability.

**Asset & document management**  
Attach package inserts, test certificates, device documents and images directly to the item – ready to hand for the whole team.

**Barcode & QR code scanner**  
Scanned with a smartphone or tablet, goods receipt, withdrawal and stocktaking are booked in seconds – including bulk capture.

**Categories & custom roles**  
Create your own categories and use roles to control exactly who on the team may see and edit what.

**Reporting**  
Analyse stock movements, consumption and inventory trends and plan resupply in good time – with clear reports.

# Assignment & tracking

Once your items are recorded in Scanwiz, every material and every device can be allocated seamlessly – to employees, wards, rooms or locations. Track withdrawals, usage and status in real time, optimise resupply and returns, and keep a complete history.

## Assignment to people & areas

Issue materials and devices to employees, wards or rooms – who uses what is instantly visible.

## Withdrawal, return & transfer

Withdrawal, return and transfer by scan – with signature, location and history.

## Assignment & scheduling

A dedicated calendar per device for bookings, maintenance and inspection dates.

## Location & history

Location changes and usage per item traceable at any time.

## Multi-tenancy

Map multiple locations, practices or wards separately and filter them in a targeted way.

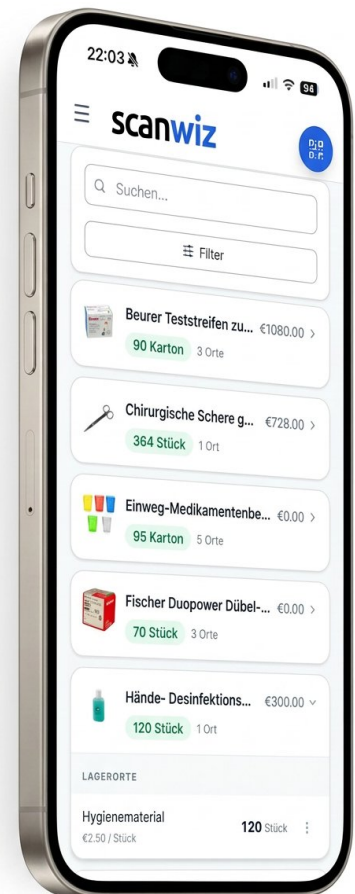

## Cloud-based inventory management

Ready to use anywhere – no installation, GDPR-compliant, hosted in Germany.

## Data import & integrations

Import existing data via Excel/CSV or connect through the REST API.

# Automated maintenance

At Scanwiz, maintenance is part of the system: a ticketing system for maintenance, repairs and inspections, QR/NFC access right at the device, meaningful analytics, secure sign-in via single sign-on and a complete warehouse module all mesh together seamlessly.

## Maintenance & ticketing system

Schedule maintenance, report repairs and manage checks and inspections – with status, comments and a digital signature.

## Tracking & analytics

Consumption, stock and usage data come together automatically – including alerts for low stock or expiring batches.

## Direct access & mobility

A QR or NFC label is all it takes: open the device file, report a fault without logging in and capture the location – right on site.

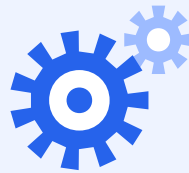

## Integration & security

Connected to existing systems via REST API – with Excel/DATEV export, single sign-on, multi-factor login and GDPR compliance.

## Warehouse & inventory management

Manage stock centrally, receive automatic minimum-quantity and expiry alerts and track every movement in the audit log.

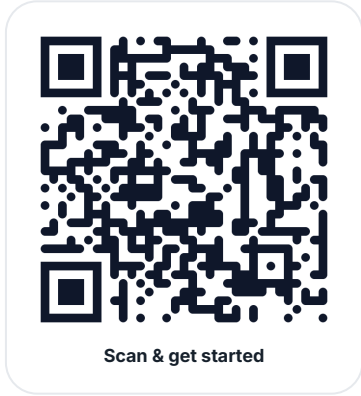

# Try it free for 14 days

Register your no-obligation demo account and organise medications, consumables and maintenance digitally in just a few minutes – no installation, no credit card.
